25X1

1. Balatonfured Shipyard

This yard is building motor tugs with 150 h.p. engines, at a rate of 4-5 per year; they are intended for service on the river Tisza.¹ It is also engaged on the construction of a large passenger motor vessel, a sister ship of the BELCIANISZ which is already in commission on Lake Balaton. The new vessel will also be used for passenger services on the same lake.

2. Pét Oil Refinery

- a. At the end of August 1953 some new construction work, mainly in the excavation stage, was in progress at the Pét Mineral Oil Undertaking, near the pumping station belonging to the pipeline from Láspe. Various pipelines at the refinery are being laid underground.
- b. It is believed that the new work is connected with the construction of a second pipeline from Láspe to Budapest and Siófok.

Comments:

25X1

1. The Balatonfured shipyard has a contract for building small vessels required for service on Lake Balaton and the river Tisza.
2. It is possible that this excavation work is connected with the newly-built fuel depot situated west of the Pét works.
